Sensei Biotherapeutics to Present Preclinical Data on SNS-103 at the CRI-ENCI Eighth International Immunotherapy Conference

September 4, 2024

BOSTON, Sept. 04, 2024 (GLOBE NEWSWIRE) -- Sensei Biotherapeutics, Inc. (Nasdaq: SNSE), a clinical stage immuno-oncology company focused on the discovery and development of next-generation therapeutics for cancer patients, today announced that preclinical data on SNS-103 will be presented in a poster session at the CRI-ENCI Eighth International Immunotherapy Conference, being held September 8-11, 2024, at the Gaylord National Resort & Convention Center in National Harbor, MD.

Presentation Details:

[CRI-ENCI Eighth International Cancer Immunotherapy Conference](#)

Title: Pre-clinical characterization of monoclonal antibodies targeting CD39 activity in the acidic tumor microenvironment

Presenter: F. Donelson Smith, Ph.D., Senior Director, Biologics Discovery & Early Development

Poster Number: 195A

Date and time: Sunday, September 8, 2024, 12:05 – 2:05 p.m. EDT

About Sensei Biotherapeutics

Sensei Biotherapeutics (Nasdaq: SNSE) is a clinical stage immuno-oncology company focused on the discovery and development of next-generation therapeutics for cancer patients. Through its TMAbTM (Tumor Microenvironment Activated biologics) platform, Sensei develops conditionally active therapeutics designed to disable immunosuppressive signals or activate immunostimulatory signals selectively in the tumor microenvironment. Sensei's lead investigational candidate is SNS-101, a conditionally active antibody designed to block the V-domain Ig suppressor of T cell activation (VISTA) checkpoint selectively within the low pH tumor microenvironment, where VISTA acts as a suppressor of T cells by binding the receptor PSGL-1. The company is also developing SNS-102, a conditionally active monoclonal antibody targeting V-Set and Immunoglobulin Domain Containing 4 (VSIG-4); SNS-103, a conditionally active monoclonal antibody targeting ecto-nucleoside triphosphate diphosphohydrolase-1 (ENTPDase1), also known as CD39; and SNS-201, a conditionally active VISTAxCD28 bispecific antibody consisting of a CD28 agonist arm and a pH-sensitive anti-VISTA arm.
